

**UNITY™**  
**UNIFIED**  
**STORAGE**  
**PLUS**  
**UNITY**  
**ACTIVE**  
**ARCHIVE**

When your data is too important to lose and too critical to be tampered with.

**Unity™ is the first and only Hyper-Unified Storage**

Hyper-Unified Storage starts - as other Unified Storage - with support for advanced block and file workloads and then adds the rich capabilities modern IT teams demand and their users require so they can access information anywhere they need it. For organizations facing extreme data growth or needing greater application performance, Unity scales from 6TB up to nearly 5PB.

**Hybrid and All-Flash Configurations**

Unity can be configured with either hybrid or all-flash configurations to deliver the performance you need by utilizing FASTier™ to blend solid-state memory including DRAM and SSD to optimize block and file operations into a fault-tolerant architecture. All-flash configurations optimized to get the most out of the flash SSDs while providing the performance to meet your most demanding applications.

**GROUNDBREAKING INTEGRATION**

Nexsan Unity’s fully integrated private cloud is intelligent, patented software that enhances our enterprise-class unified storage Enterprise File Sync & Share (EFSS), Mobile Access, Multi-site Sync, and a secure active archive client in a simple to manage and cost-efficient system. The secure active archive client delivers the seamless integration into the Unity Active Archive which can be added to Unity to provide a comprehensive data protection feature-set which ensures the availability and integrity of all files.

**Unity Active Archive**

Unity Active Archive is ideal for any organization that needs to implement long-term archiving, regulatory and corporate compliance or add protection against data loss that could come from ransomware attacks, silent data corruption, or human error. Unity Active Archive is an optional system built to work seamlessly with Unity so users won’t change how they access data and it will still be easily available.

**Security and Compliance in the Modern Enterprise**

Nexsan’s Unity with Unity Active Archive delivers groundbreaking patented technology to protect your organization’s data while still meeting the user’s increasing demands for easy data access so they can work anywhere, anytime and from any device. Too often employees neglect the corporate policies and use public cloud services or email to share sensitive or regulatory information, putting the company at risk.

**REGULATORY AND CORPORATE COMPLIANCE**

Unity Active Archive makes it easy for organizations to adhere to internal guidelines or governmental regulations by exceeding requirements for data integrity, protection, privacy, security, longevity and availability with full audit trails.

Unity Active Archive is proven to comply with governmental regulatory requirements including HIPAA, GLBA, Sarbanes-Oxley, Federal Rules of Civil Procedure (FRCP), SEC 17A-4, Chain of Custody and PCI DSS.

## POLICY-BASED ARCHIVING

Unity Active Archive enables IT administrators to centrally manage and enforce policies for each type of unstructured data in your organization. Once the policies are set, Unity Active Archive manages and protects your unstructured data with its fully-automated processes for archiving, data integrity protection, multi-site replication and primary storage offload. Just set it and forget it.

## PROTECT AGAINST ATTACKS

Unity Active Archive's built-in resistance to file tampering or destruction gives you real-world protection against ransomware attacks. Your anti-malware products are not infallible so you need a second line of defense. Active Archive provides protection against unauthorized or accidental changes or deletions of your files by people, viruses or ransomware. If ransomware or other attacks do get past your defenses, files that have been protected in Unity Active Archive will be protected and will remain safely untouched. High speed restore of file shortcuts allows recovery to a point prior to the ransomware attack, and takes only minutes.

## ABOUT NEXSAN

Nexsan is a global leader in storage, back up and data management solutions that are focused on seamlessly and securely enabling a connected workforce. Its broad solution portfolio empowers enterprises to securely store, protect and manage valuable business data – allowing users to sync, share and access files from any device, anywhere, anytime.
